Subject: Application for the post of the Data Scientist

Dear Sir/Madam,
I am excited to apply for the position of Data Scientist at xyz company. I'm a recent graduate[2022] from Don Bosco Institute of Technology, and I'm eager to enter the workforce. I meet all the academic requirement mentioned in your job posting

I am passionate about automation and analytics, which led me to pursue a Bachelor of Information Technology, with Honours in AI-ML. I recently completed an internship at 123 company as a Data Analyst, where I was responsible for analysing data to drive optimization and improvements of products. I also did an internship as a Data Science Intern at 123 Technologies. I help forecast sales for our clients with a 98% accuracy rate. I work and collaborate cross-functionally with our various departments. I learned valuable critical thinking and problem-solving skills that would make me a great addition to the xyz Company team.

I have extensive experience in C++, Python, and SQL, as well as Tableau and PowerBI. As a passionate Data Scientist, I have the experience needed to help xyz Company grow. I am dedicated to continuously learning and enhancing my skills. I admire xyz Company's dedication to data-informed product building, and I would be thrilled to join the team. With my background in managing large data sets and visualising information, I can help xyz Company achieve its goal of expanding into new markets. I have been following xyz Company's work for a long time, and I admire the range of projects you do across industries.

Thank you very much for your time and consideration. I have attached my resume with my application. Please feel free to contact me at 8879812574 or email me at mohdzaid88798@gmail.com. I hope to hear from you soon.

Yours Sincerely
Mohammad Zaid Ansari
